

Engine Repair

Fel-Pro® Premium Head Sets (HST), featuring PermaDryPlus® technology!

These new HST sets from Fel-Pro® are designed for the cylinder head repair/replacement occasion, making it easier for the technician who wants to use premium PermaDryPlus® intake gaskets for the repair. The HST set equals a standard HS head set plus a PermaDryPlus intake manifold set, at a less expensive price than buying the individual sets. The HST set also includes PermaTorqueSD® severe duty head gaskets, another premium upgrade to the standard set.
