# INSTALLATION INSTRUCTIONS

## JEEP TRANSMISSION PAN HEAT SHIELD

PART # 10375 - '18 - UP JEEP WRANGLER JL & JT W/ 850RE TRANSMISSION

PART # 10376 - '12 - '18 JEEP WRANGLER JK W/ W5A580 TRANSMISSION

PART # 10377 - '07 - '11 JEEP WRANGLER JK W/ VLP 42RLE TRANSMISSION

**INSTALLATION QUESTIONS? CONTACT DEI AT 800-264-9472  
OR VIA EMAIL AT [TECH@DESIGNENGINEERING.COM](mailto:TECH@DESIGNENGINEERING.COM)**

**NOTE OF CAUTION: Wear eye and hand protection when installing all materials.**

### PARTS CHECKLIST

Custom Cut Heat Shield

### NOTES

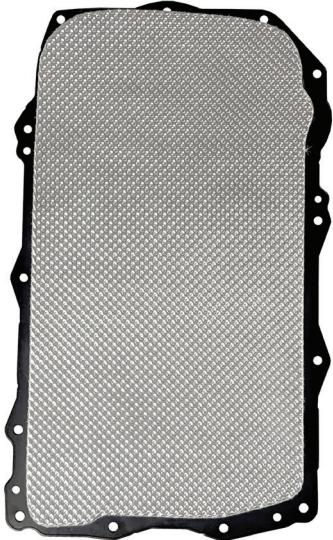

- Test fit all parts

### SURFACE PREP

Clean surfaces with Windex/glass cleaner/microfiber towels. **ALL SURFACES MUST BE CLEAN AND GREASE/DIRT FREE** for product to adhere properly to surfaces.

### TOOLS

1. Clean bottom of transmission pan thoroughly. For proper long lasting adhesion, you must remove all dirt, grease and oils from the pan before adhering the shield.
2. Test fit the shield to the bottom of the transmission pan to make sure you have the proper orientation. The shield is custom cut for your specific model so it will only fit properly one way.
3. Once it is in the proper location, peel a small section of the backing liner away from one of the corners and stick it in place. Make sure it is in its proper place. The adhesive is **VERY aggressive**.
4. Pull the backing liner away slowly from the back and press shield in place as you do this. This will allow you to make sure everything is aligned properly with the pan as you install the shield.
5. Press the entire shield in place firmly. An installation roller is a great tool to make sure you have good adhesion.
