

ORACLE LIGHTING

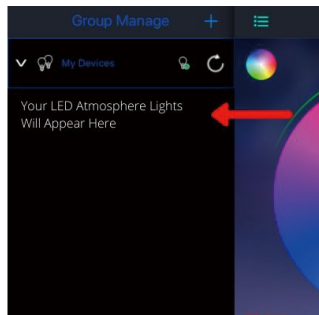

StreetSync PRO™

01 Download "Magic Lantern" from the App Store or Google Play Store.

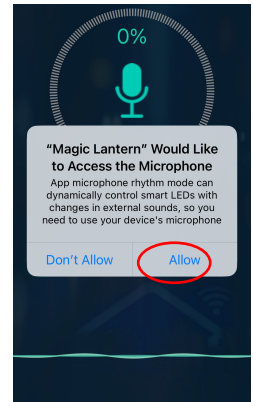

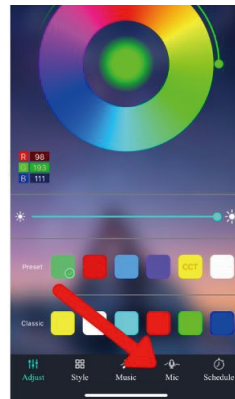

02 Open the app and click "Allow". If you click "Don't Allow", go to your phone's settings and find "Magic Lantern". Allow Bluetooth through your phone's settings. This is essential to connect your phone to your lights.

03 Turn on your phone's Bluetooth and turn on the LED Whips. Press the icon in the top left corner of the app. Device will appear under "my devices" (this may take up to 3 minutes). Click on your lights to finish pairing them with your app.

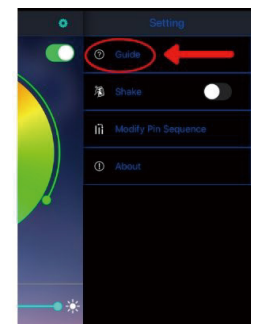

Music Mode

Currently music mode is only available for songs that have been downloaded to your phone. Apple Music, Spotify, and other streaming services generally do not download songs to your phone. As a solution, you can use the "Mic" mode so that your lights automatically adjust to the sound of music. To use "Mic" mode, click "Mic" in the bottom right of the screen. Then, click "Allow" to allow the app to access your phone's mic.

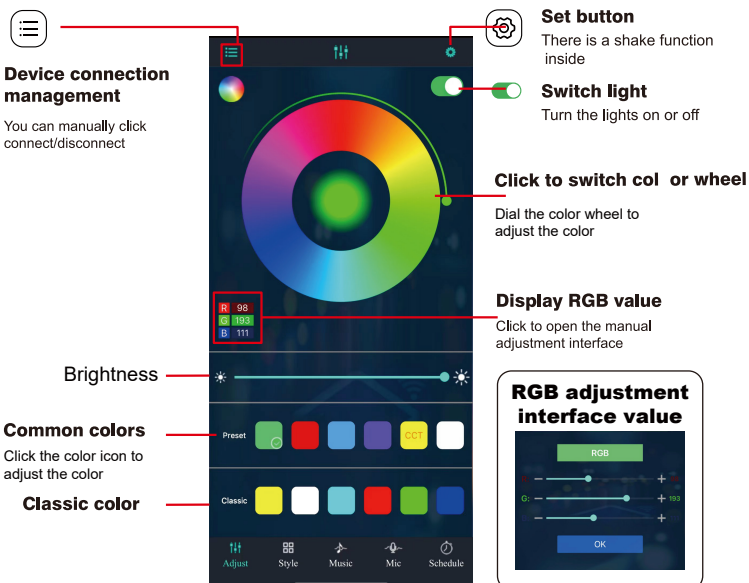

Any other questions? You can find a guide on the app's features by clicking "settings" in the upper right hand corner of the screen, then clicking "guide".

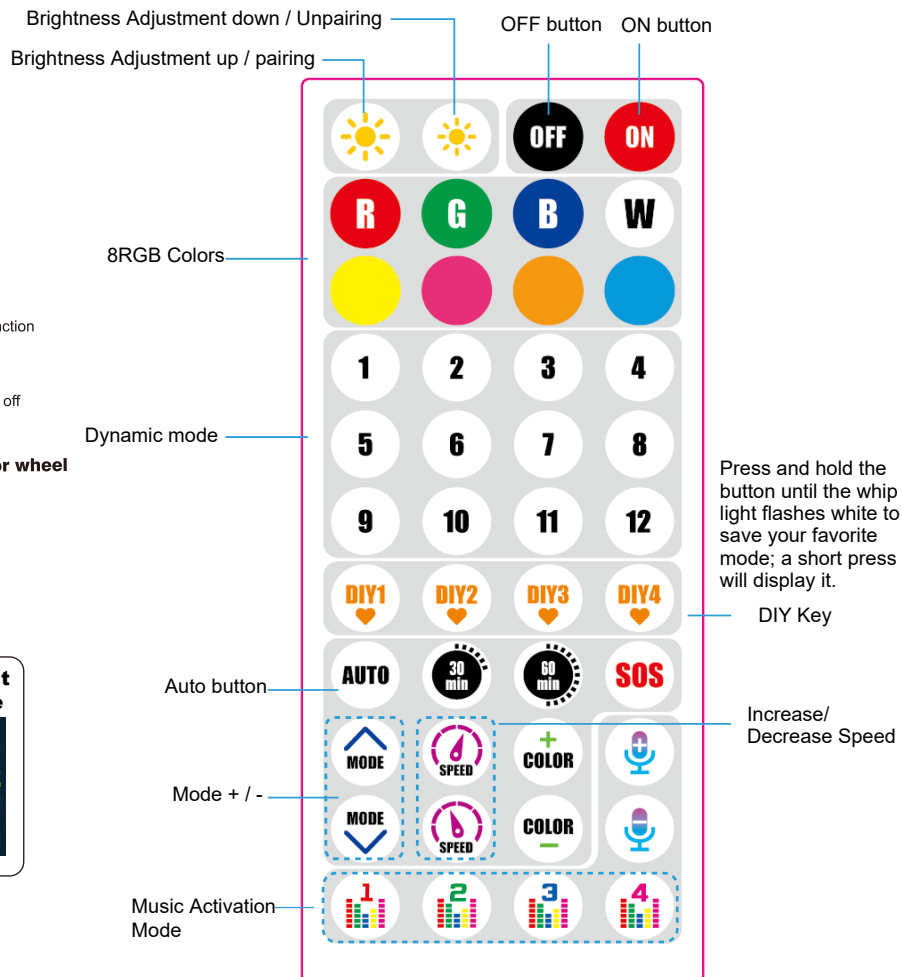

LED ATMOSPHERE LIGHTS CONTROLLED BY MAGIC LANTERN APP

Warning

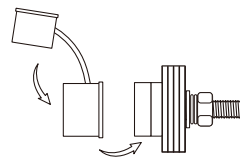

It is recommended that this installation be performed by a licensed professional. The improper installation of this kit will void all warranties.
PLEASE READ THE FOLLOWING INSTRUCTIONS THOROUGHLY BEFORE INSTALLING AND OPERATING THIS LED WHIP

Step 1 Mount Up

- 1 Remove the bottom nut and the spring washer on the bottom of your quick-release mount.
- 2 Mount the LED WHIP into any open 1/2" bolt mount on your vehicle. Make sure the flat washer is between the whip and the mount.
- 3 Place the spring washer underneath the mount and then rescrew the bottom nut.
- 4 Have a pair? Go for round 2 and mount the 2nd whip the same way

Step 3

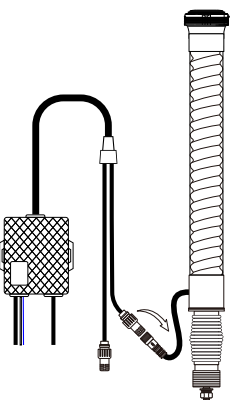

When whip is not attached to base, using supplied cap to keep dirt and debris out of connector.

Wiring Routing & Switch Installation

Route the wiring harness according to your specific mounting location. Then, install the switch into a standard Carling-style opening on your vehicle's dashboard or switch panel.

Step 2 Get wired!

- 1 Grab your battery cord and connect it to the bottom hanging cord on your LED WHIP
- 2 Have a pair? Connect the 7 Pin plug coming out the side of the master LED WHIP to the plug coming from the slave LED WHIP.
Note: The slave LED WHIP cannot function without being connected to the master LED WHIP.
- 3 Feed the power cord through to your vehicle battery.
- 4 Connect the terminal wire to the Positive (+) and Negative (-) terminals of your vehicle battery.
- 5 Hide any extra wiring with zip ties
