ORACLE LIGHTING

VEGA SERIES 7 LED+LASER 135W LIGHT POD SPOTLIGHT

PART #5921-7-001

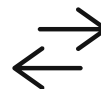

Fitment: Universal

Retail: **\$595.95** Jobber: **\$506.56**

Using only high-quality components in a package designed from scratch to provide unparalleled performance, value, and durability. The IP69K ingress-protection and OE level Deutsch DT connectors increase the overall reliability while OSRAM LED Chips kick out high lumen illumination. CAE analysis allowed refinement of both the optimization of the lens optics as well as the thermal dynamics to create a product which is both powerful and reliable.

The ORACLE Lighting Vega 7 pushes high current through powerful LEDs—unlocking maximum light output for unmatched off-road visibility. But with high current comes heat, and that's where ORACLE's innovation sets the Vega 7 apart. Unlike passive systems that rely solely on metal fins, the Vega 7 uses an advanced active cooling solution: a high-efficiency brushless fan circulates air through precision rear cooling fins. This airflow dynamically regulates the internal temperature, ensuring the LEDs operate at peak performance. The result is brighter, more consistent light with extended component life—engineered to perform under the most extreme conditions.

**2,755 FT PROJECTION
DISTANCE**

**INTENSE 12,000 RAW
LUMEN OUTPUT**

**IP69K INGRESS
PROTECTION**

5 YEAR WARRANTY

FEATURES:

- Tested Brightness: 676,900 CD
- Unique Versatile Patent-Pending Design
- Designed and Engineered in the USA
- Powdercoated Aluminum Construction
- Integrated Deutsch DT Plug and 2' Whip

ACCESSORIES (Sold Separately):

Amber Lens Cover (Snap Fit)
PART #5921-7-AC

Yellow Lens Cover (Snap Fit)
PART #5921-7-YC
