FLEXIBLE RMF PROTECTION
Reactive Memory Foam (RMF) gives you the best of both worlds: all-day comfort and serious impact protection. The foam stays soft and flexible while you ride, molding to your knee for a natural, unrestricted feel. The moment you take

TARGETED AREA PROTECTION
Bike hugging molded bio-foam shields your knee and shin from impacts, and the foam wings keep the pad tight to the bike so you can stay locked in. More control. More confidence. No slipping, even when the ride gets sketchy.

STABLE, ANTI- MIGRATION
Strategically placed silicone grippers and straps ensure the knee pad stays securely in place, reducing unwanted movement and discomfort.

INCREASES STABILITY
The inner compression sleeve delivers a snug, supportive fit that boosts knee stability and prevents pad slip, keeping your focus on the ride, not your gear.
