

# Silver Bullet®

Throttle Body Spacer

PN 46-30007

## INSTALLATION INSTRUCTIONS

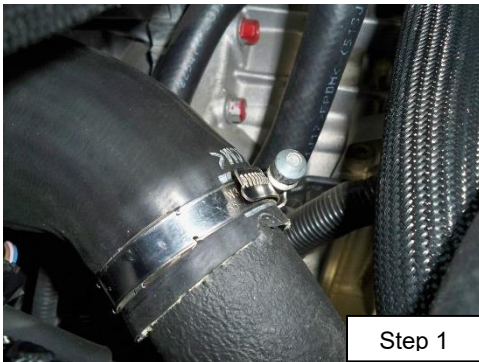

### Important!

Please verify the Parts List and read all instruction steps before you begin installation.

Year	Make	Model	Engine
2019-2022	Hyundai	Veloster N	I4-2.0L (t)
2022-2023	Hyundai	Kona N	I4-2.0L (t)
2022-2026	Hyundai	Elantra N	I4-2.0L (t)

1. Remove the air cleaner assembly and intercooler outlet hose from the throttle body.
2. Unplug the throttle body connector by pressing the tab and gently pulling it free.
3. Using a 10 mm socket and driver, remove the four (4) screws securing the throttle body to the intake manifold. (Note: These factory screws will not be reused in this installation. However, you may want to keep them in case the spacer is ever removed and the vehicle is returned to stock.) Remove the throttle body.
4. Ensure the factory O-ring seal on the intake manifold is in place and free of debris.
5. Install the provided O-ring seal onto the aFe **Silver Bullet** throttle body spacer.
6. Position the aFe **Silver Bullet** throttle body spacer between the intake manifold and the throttle body, with the “Air In” side facing the throttle body and the word “Top” facing upward.
7. Install the throttle body using the provided hardware: place one (1) lock washer and one (1) flat washer onto each of the four (4) M6 × 75 mm screws. Secure the throttle body and spacer to the intake manifold using a 10 mm socket and driver. Tighten the screws to 11 N·m (8 ft·lb).
8. Reinstall the intercooler outlet hose and air cleaner assembly removed in Step 1 and tighten all connections.

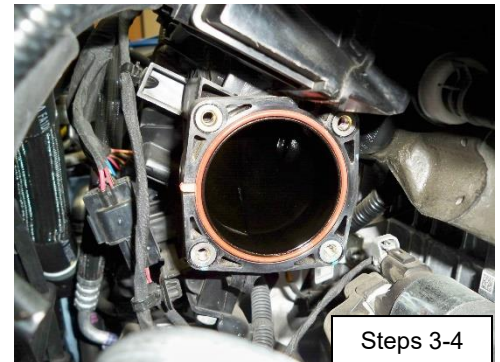

Your installation is now complete! Make sure to retighten all bolts and clamps after 100 miles of driving.
