

APPLICATION

AMP Part #

Jeep Wrangler JK 4Dr

2007-2018

77122-01A

INSTALLATION GUIDE

INSTALLATION TIME

3-5 Hours

Professional installation recommended

SKILL LEVEL

4= Experienced

TOOLS REQUIRED

- Safety goggles
- Measuring tape
- 10 mm socket
- 13 mm socket
- 1/2" socket
- Ratchet wrench and extension
- Wire crimpers
- Wire stripper / cutter
- 3/16" hex key wrench (allen wrench)
- 4mm hex key wrench (allen wrench)
- Electrical tape
- Weather proof caulking (silicone sealer)
- Silicone spray

WARRANTY

5-Year Limited Warranty

REALTRUCK TECH SUPPORT 1-888-983-2204 (Press 2) Monday - Friday, 8:00 AM - 5:00 PM EST

Designed and manufactured by RealTruck AMP Research® • Made in Mexico
 Patent Protected. Please see our product site for applicable patents. www.realtruck.com/b/amp-research/
 © RealTruck Group, Inc., 2024 • Three-year limited warranty. • Professional installation is recommended.

EXPLODED VIEW

- Motor
- Hex Head Bolts

CAUTION: HANDLE WITH CARE.

To ensure our customers receive all components with full integrity, we pack the motors separate from their linkage assemblies. This requires that the installer position and fasten the motor before continuing with the install. Please follow the instructions below and handle the assembly carefully.

CAUTION: Dropping the assembly or any excessive impact MAY cause damage to the motor.

Instructions:

1. Position the gear cover in place as shown if not already in place.
2. Seat motor into position on the two mounting bosses. This may require an adjustment of the gear by moving the swing arms.
3. After seating into place, fasten the motor with the two motor mount bolts with 13mm Wrench. Tighten bolts to 36 in-lbs (4N-m). **Do not over torque.**

REALTRUCK AMP RESEARCH POWERSTEP XL™ – JEEP WRANGLER JK

Locate rear linkage installation position in front of rear body mount

1

Install adaptor as shown

2

Assemble Support tab(28) to Linkage mounting bracket with supplied bolts(9) and nuts(13). Torque to 16ft-lbs. Next using flange bolt(9) and nut(17) thru support tab in bracket and tighten to 16ft-lbs.

Set bracket in place. Start with Button head bolts(10) thru pinch weld with flange nuts(17). Snug into position, start rear mounting bolt in threaded block using captive washer bolt(16). Note: Use right facing brackets on driver side. Mirror for passenger side.

3

Install U nut (20) under vehicle, middle of front door for front motor linkage as shown. (Some vehicles with factory steps may already include this u-nut)

4

Front of vehicle passenger side →

Set front linkage mounting bracket into position. Follow same mounting steps as step 3.

5

Slide 6 carriage bolts (15) into rail pocket of driver side rail. Add Light Bracket (26) to the 1st and 4th bolt counting from the front side. Insert Flange Nut (17) onto bracket tab to attach light brackets into position shown. Leave loose to allow for adjustment.

Driver side image shown below

6

Adjust the remaining bolts to slide over brackets. Use supplied flange nuts (17) and attach rail to brackets. Center rail between body rocker and torque 4 flange nuts to 16 ft-lbs.

Assemble Flange bolt (12) with nut (17) thru support tab on bracket as shown. Torque to 16ft-lbs.

7

Attach front support bracket (28) by inserting carriage bolt (15) into rail and using supplied button head bolt (10), washer (18) and flanged nut (17) to pinch weld.

Torque bolts to 16ft-lbs.

8

Install provided spacer (19) and M6 bolt (12) into upper mount as shown on both the drive and idler linkages. Do not tighten.

8

Slide mounting T-nut into position. Center board in rail pocket. Tighten fasteners to 10 ft-lb

9

Using a 13mm socket, torque linkage bolts 4x (16) from step 3 to 16 ft-lbs. Next use a 10mm socket, torque linkage spacer bolt 2x (12) from step 6 to 8 ft-lbs. Once linkages are tight cycle board to verify steps deploy under own weight.

10

Attach motor to linkage. Using a 13mm wrench
Torque to 36 in-Lbs.

11

Remove fuses from Power Step Wire Harness.

12

Install controller on passenger side at firewall.
Secure with 11" cable ties. Connect Red wire to positive battery terminal and Black wire to negative battery terminal.

13

Route longest leg of wire harness across fire wall to driver side and under vehicle outside of frame rail.
Route shortest leg of wire harness down fire wall and outside of frame rail on passenger side.

14

Remove passenger side front door sill.

15

Lift carpet. Slit rubber grommet and pass trigger wires through grommet in floor into passenger compartment.

16

Posi-Tap™ instructions

17

Use Posi-Tap connectors to connect Power Step trigger wires to like colored wires in the factory system as shown: Violet/White wire in loom coming from front door, Violet/Yellow and Violet/Grey in main loom in door sill. **Note: For door removal attach posi tap on chassis side of door harness.**

18

Remove driver side door sill and pull up carpet.

19

Route Violet wire under carpet to driver side door sill and connect to violet wire coming from door as shown. **Note: For door removal attach posi tap on chassis side of door harness.**

20

REALTRUCK AMP RESEARCH POWERSTEP XL™ – JEEP WRANGLER JK

On driver side, run Wire Harness leg down and along underside of the vehicle floor and frame to front Drive Linkage. Connect harness to motor and secure harness with tie wraps. Route remainder of wire harness towards rear linkage assembly for LED lights. Repeat step on passenger side.

21

Affix LED lamps (25) to the light brackets (26) that were installed on rail in step 6. Slide bracket into desired position and tighten using 5/32" Allen key.

22

Using supplied butt connectors(23), connect the lamp wires. Red to Red, Black to Black. Once Crimped use heat gun to shrink tube. Close and wrap conduit with electrical tape. Secure all loose wires with cable ties. Pull lamp wires upward to avoid any wire snagging.

23

Reinstall Fuses from Powerstep Wire Harness.

24

Check that all doors activate the Power Step and the LED Lights work when doors open and close. Reinstall any remaining trim panels.

FINAL SYSTEM CHECK

Check that all doors activate the PowerStep and the LED lights work when doors open and close.

NORMAL OPERATION: When the doors open, PowerStep automatically deploys from under the vehicle. When the doors are closed, PowerStep will automatically return to the stowed/retracted position. **Note that there is a 2-second delay before the PowerStep returns to the stowed/retracted position.**

CORRECT OPERATION OF LIGHTS: All four lamps will illuminate upon opening any door of vehicle. Lamps will stay on until restowing of both Power Steps or until 5 minutes has expired with the doors open. When the lights timeout after 5 minutes, they can be reilluminated by closing and opening any door of vehicle.

Rev 05.30.24

Congratulations on your purchase of the genuine RealTruck / AMP Research PowerStep! Here's what you should know...

POWER-DEPLOYABLE RUNNING BOARDS OPERATION: RealTruck / AMP Research PowerStep running boards automatically move when the doors are opened to assist entering and exiting the vehicle.

Automatic power deploy:

The running boards will extend down and out when the doors are opened.

Automatic power stow:

The running boards will return to the stowed position when the doors are closed. There will be a 2-second delay before the running boards move to the stowed position.

Automatic stop:

If an object is in the way of the moving running board, the running board will automatically stop. To reset, clear any obstruction, then simply open and close the door to resume normal operation.

Manually set in the deployed (OUT) position for access to the roof:

The running boards can be manually set in the deployed position by firmly holding the step down with your foot while at the same time closing the door. To resume normal operation, open and close the door.

Maintenance: In adverse conditions, debris such as mud, dirt, and salt may become trapped in the running board mechanism, possibly leading to unwanted noise. If this occurs, manually set the running boards to the deployed position and flush the front and rear hinge arms with a high-pressure car wash wand.

Avoid spraying the motors directly. After washing, apply silicone spray lubricant to the hinge pivot pins. Do not apply silicone, wax or protectants like Armor All® to the running board stepping surface.

Caution! Keep hands away when the running board is in motion.

5-YEAR LIMITED WARRANTY

RealTruck / AMP RESEARCH warrants this product to be free from defects in material and workmanship for FIVE (5) YEARS FROM DATE OF PURCHASE, provided there has been normal use and proper maintenance. This warranty applies to the original purchaser only. All remedies under this warranty are limited to the repair replacement of the product itself, or the repair or replacement of any component part thereof, found by the factory to be defective within the time period specified. The decision to repair or replace is wholly within the discretion of the manufacturer.

This warranty specifically excludes labor. If you have a warranty claim, first you must call our factory at the number below for instructions. You must retain proof of purchase and submit a copy with any items returned for warranty work. Upon completion of warranty work, if any, we will return the repaired or replaced item or items to you freight prepaid. Damage to our products caused by accidents, fire, vandalism, negligence, misinstallation, misuse, acts by nature or by defective parts not manufactured by us, is not covered under this warranty.

ANY IMPLIED WARRANTIES OF MERCHANTABILITY AND/OR FITNESS FOR A PARTICULAR PURPOSE CREATED HEREBY ARE LIMITED IN DURATION TO THE SAME DURATION AND SCOPE AS THE EXPRESS WRITTEN WARRANTY. OUR COMPANY SHALL NOT BE LIABLE FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGE.

Some states do not allow limitations on how long an implied warranty lasts, or the exclusion or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply to you. This warranty gives you specific legal rights, and you may also have other rights that vary from state to state.
