FLEXIBLE RMF PROTECTION

Reactive Memory Foam (RMF) gives you the best of both worlds: all-day comfort and serious impact protection. The foam stays soft and flexible while you ride, molding to your knee for a natural, unrestricted feel. The moment you take

TARGETED AREA PROTECTION

Bike hugging molded bio-foam shields your knee and shin from impacts, and the foam wings keep the pad tight to the bike so you can stay locked in. More control. More confidence. No slipping, even when the ride gets sketchy.

ENGINEERED TO KEEP YOU COOL

Class-leading engineered Hexprene fabric gives you targeted support while pushing airflow through the pad to keep you cool, dry, and protected on every ride.

INCREASES STABILITY

The inner compression sleeve delivers a snug, supportive fit that boosts knee stability and prevents pad slip, keeping your focus on the ride, not your gear.
