

FEL-PRO INSTALLATION TIPS

PLASTIC COMPOSITE WATER OUT-LET AND WATER PUMP GASKETS

The water outlet and/or water pump gasket(s) contained in this set is a new composite construction resulting from extensive engineering and extreme testing conditions. This new compound gasket offers the following featured.

If mating surface is pitted or corroded apply a gasket sealer to both sides of gasket(s).
PRIOR TO INSTALLATION insert mounting bolts through the casting and the Hole Lock bolt hole locations in the gasket.
ATTACH AND ALIGN ASSEMBLY.

© 2000 Federal-Mogul Corporation
Form No. I-3TEMP (Rev. 9/8/00)
Printed in U.S.A.

Withstands high and low temperatures
Patented sealing bead design provides superior sealability
Hole Lock design holds gasket in place during installation.
Additional sealers are not generally required.
