

2.7 Coilover

Performance Suspension

Engineered for drivers who push their rigs harder and demand more.

Race Proven Technology

DIGRESSIVE DAMPING

Digressive valving delivers high damping force for confident on-road handling and soaks up the hits off-road.

Premium Build & Finish

TYPE III HARDCOAT ANODIZED

6061-T6 aluminum body provides significantly better wear resistance, corrosion protection, and thermal management compared to Type II finishes.

Vehicle-Specific Top Mount OE QUALITY

Designed and fully assembled specifically for your application. Just bolt on and go.

2.7" Shock Body 60MM PISTON

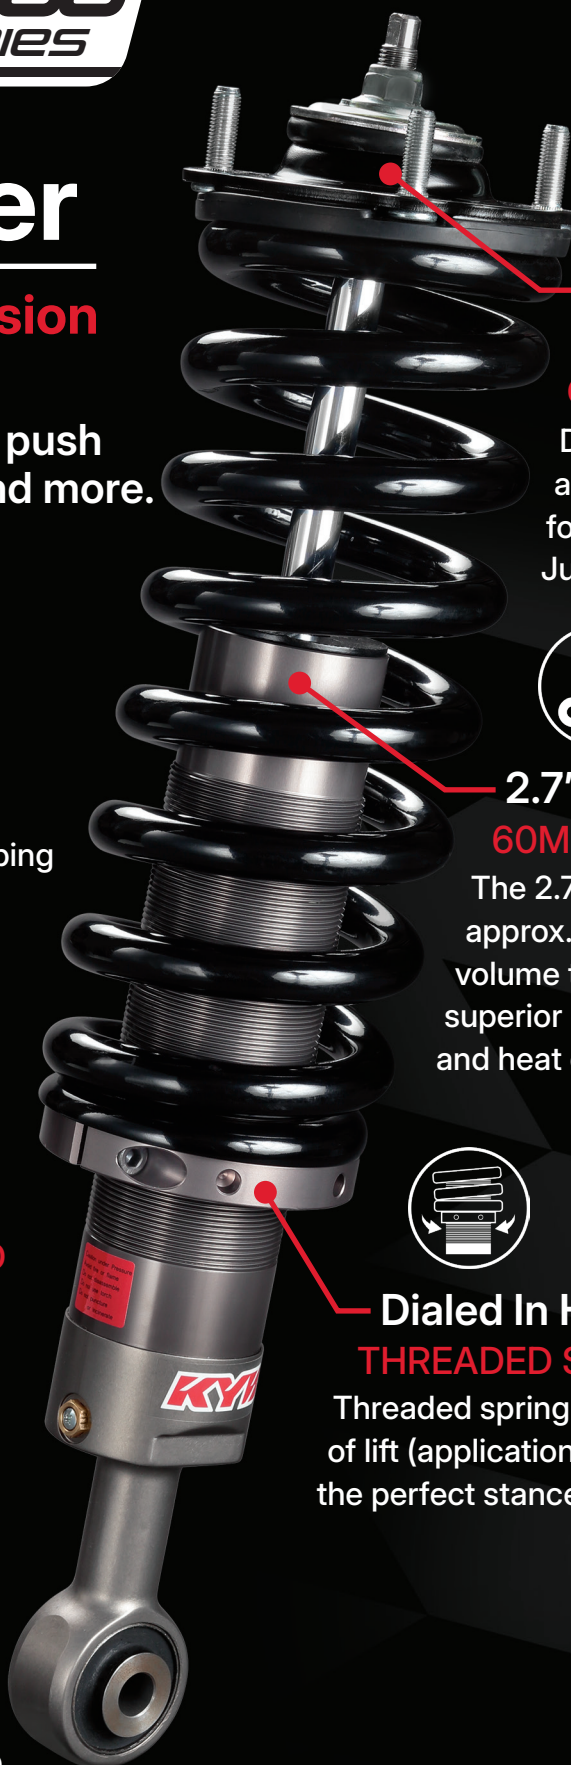

The 2.7" shock body holds approx. 17% more volume than a 2.5" body for superior damping performance and heat dissipation.

Dialed In Height

THREADED SPRING SEAT

Threaded spring seat allows up to 3" of lift (application dependent) to dial in the perfect stance and clear larger tires.
